## SUMMARY STATEMENT

Skilled problem solver who loves to learn new technology while finding unique solutions to difficult problems. Expert in customer service and mentoring while writing clear, concise code and creating an atmosphere that inspires growth. Capable leader and follower able to drive team members to do their best. Team-focused and quick to build long-term relationships with colleagues and clients.

## PERSONAL SKILLS

- Hardworking and professional at all times with proven ability to work without direct supervision.
- Able to learn new technologies in a short amount of time and able to apply new learning to new situations.
- Focused on details and completing tasks before moving on.

## PROFESSIONAL SKILLS

### Communication

- Consistently writes code with clear comments and formatting with the next developer in mind.
- Prepared and delivered professional presentations to stakeholders.
- Able to explain technical, complex concepts to diverse audiences.

### Continual Learning

- Continuous refinement of the practice of teaching by reflecting on data and professional feedback.
- Challenges self to create new strategies to increase clarity and personal performance.
- Sees obstacles as opportunities to extend previous understanding or develop new algorithms to add to my toolbox.

### Supporting Others

- Values team member contributions with respect and challenge others to explain rationale in an effort to develop a product everyone can be proud of.
- Offers assistance, without judgment, to anyone stuck on a problem.
- Creates results-driven environments of mistakes being expected, respected, inspected then corrected.
